Subject: Syngenta US - EPA Audit Policy compliance certification - trace amount of Fluowet PL 80-B used in manufacturing Trifloxysulfuron-sodium (TSS) technical

Hi Ed, Mike and Marietta - I'm following up on our prior conversations and updates on the subject topic.

Syngenta Crop Protection, LLC (Syngenta US) submitted its compliance certification late yesterday, via the eDisclosure system and in accordance with the EPA Audit Policy.

Our compliance certification includes details regarding discovery of the potential FIFRA violations; nature and description of the potential violations (trace amount of Fluowet PL 80-B - containing PFAS - used in manufacturing TSS technical); steps taken by Syngenta to correct the potential violations; and steps taken by Syngenta to prevent recurrence of the potential FIFRA violations.

Please let me know if you have any questions and if we can provide any additional information that would be helpful to the Agency.

Regards,
John
